

# Lockdown and volunteering in the countryside

Nino PARJIKIA

Université Paris Cité

**Beaumotte-Aubertans, Franche-Comté, France, 2020.**

***Association Centre de Beaumotte***

**During lockdown I was volunteering in an ESC project in the center of Beaumotte. I spent the three months of lockdown in a big house with a group of ten people (volunteers, resident teenagers of the center and employees).**

**My photos show the impact of lockdown at an individual and collective level in a rural area in France.**

**Highlighted themes: mental health, collective life, atmospheres, volunteering during the COVID-19 pandemic.**
